The National Association of Boards of Pharmacy (NABP) Moves to Next Phase of Technician Recognition and Regulation

Touts the Pharmacy Technician Certification Board Examination as National Standard

WASHINGTON, D.C. – The Pharmacy Technician Certification Board (PTCB) is proud to announce a new recommendation issued by the National Association of Boards of Pharmacy (NABP) Task Force on Standardized Pharmacy Technician Education and Training which encourages state boards of pharmacy to require certification by the PTCB.

The Task Force recommended, and the NABP Executive Committee approved, that NABP amend the Model Act to a recommendation that all boards of pharmacy require pharmacy technicians to be certified by 2015, in accordance with the JCPP Future Vision of Pharmacy Practice.

Technician accountability is vital for a new vision of pharmacy practice and new roles for pharmacists and pharmacy technicians. Part of ensuring that pharmacy technicians meet such standards is the implementation of a standard measure of competency. Toward this end, under the advisement of the task force and the approval of the Executive Committee, NABP encourages the boards of pharmacy to require certification by the PTCB. These announcements were released at NABP’s annual meeting held last week.

The Task Force’s recommendation to certify all pharmacy technicians using the Pharmacy Technician Certification Exam (PTCE) comes at a time when the demand for technician competency through uniform standards has never been greater. A 2007 poll commissioned by PTCB showed that 91% of American consumers surveyed support strong regulations across the country to protect patient safety by requiring that pharmacy technicians be trained and certified.

“The task force’s latest encouragement of this standard reinforces PTCB’s place as the strongest certification program available for pharmacy technicians,” said Melissa Murer Corrigan, RPh, Executive Director and CEO of PTCB. “Having consistent requirements for pharmacy technician certification in every state is an important first step towards meeting the high standard of safety that patients expect and deserve.”

NABP has been at the center of developing, implementing, and enforcing uniform standards for states since 1904. NABP reviewed and approved the PTCE through Resolution 96-1-2000, which was adopted by the NABP member boards at the 96th Annual Meeting in 2000.
PTCB is currently the only certification program endorsed by NABP, the American Pharmacists Association (APhA), and the American Society of Health-System Pharmacists (ASHP). PTCB has certified over 339,000 technicians since 1995, and more than 10,000 pharmacy technicians have applied for the PTCE since continuous testing launched on April 1, 2009.

**About the Pharmacy Technician Certification Board (PTCB)**

PTCB was established in January 1995 and is governed by five pharmacy organizations - the American Pharmacists Association (APhA), the American Society of Health-System Pharmacists (ASHP), the Illinois Council of Health-System Pharmacists (ICHP), the Michigan Pharmacists Association (MPA) and the National Association of Boards of Pharmacy (NABP). The goal of the PTCB national certification program is to enable pharmacy technicians to work more effectively with pharmacists to offer safe and effective patient care and service. PTCB contracts with Pearson VUE, the industry’s technology leader, as its computer-based testing vendor. PTCB draws upon the experience and expertise of its 13-year partner, Professional Examination Service (PES) for test development.
